

UConn Home & Garden Education Center - Print & Go Guide

*Keep all measurements in the same unit.

Formula to Calculate Slope:

$$\frac{\text{Rise}}{\text{Run}} \times 100 = \% \text{Slope}$$

Site (A)

$$\text{————} \times 100 = \text{———}\%$$

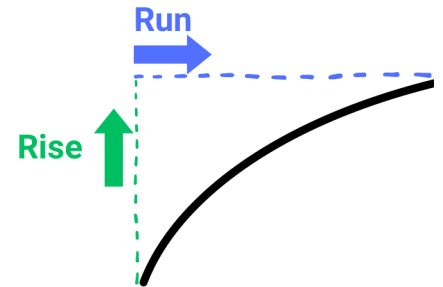

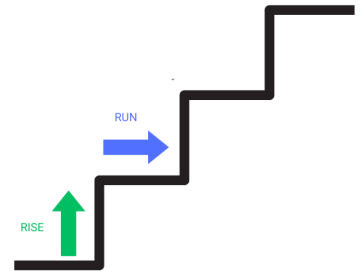

Site (B)

$$\text{————} \times 100 = \text{———}\%$$

Site (C)

$$\text{————} \times 100 = \text{———}\%$$

*Remember to *average* multiple sites on same incline for overall slope calculation.

Use this space for scratch work calculations!
